

# COMPOSTER

To make the composter you will need a two litre bottle, spray bottle, soil but not compost, tea towel, pin and scissors.

1. Find a 2 litre bottle
2. Get an adult to cut the top of the bottle
3. And get a adult to push a pin at the bottom of the bottle
4. Put some soil in the composter but not compost
5. Put some paper shreddings in
6. Get a spray bottle and spray a little bit in
7. Get some food waste and put it in
8. Put it in the sun
9. When not in use put a tea towel over it

I've been watching my COMPOSTER every 2 days and watering it and mixing it.

As you can see it has changed over the last 2 weeks
